SULLIVAN-RICE HEADQUARTERS ESTABLISHED IN RENO

GREAT PROMOTERS BUY IN FAIRVIEW AND WONDER

Over $400,000 Cash Paid Out for Mines and Prospects in These Noted Districts

L. M. Sullivan and G. G. Rice, who together own two-thirds of the capital stock of the L. M. Sullivan Trust Company of Goldfield, of which T. B. Rickey the Carson banker is now president, are in Reno. They have decided to make Reno their business home. Sullivan has been quietly picking up Wonder and Fairview properties during the past three months and Rice has placed these properties in the east among banking and brokerage houses.

The Sullivan-Rice purchases for the eastern syndicate organized by Rice represent an outlay of over $400,000 in cash paid for mines and prospects in the Wonder and Fairview districts, besides large considerations in blocks of stock in companies about to be formed to operate the properties.

A Great List

The list includes the following:

Fairview-Cedar group of four claims, 600 feet from the Nevada Hills Bonanza, $110,000 and a fifth of the ownership stock. Across these claims the famous mother vein of the Fairview district was recently traced by Engineer Gunn of the Guggenheims and assays have since been obtained "way up in the pictures" in the prospect shaft sunk on the main ledge.

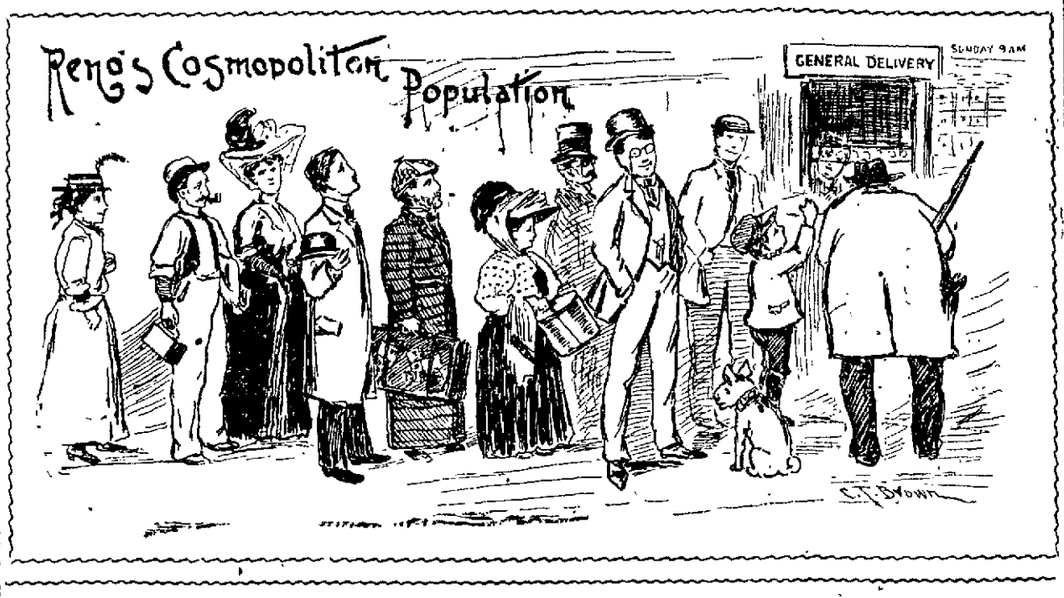

Fairview, Reliance and Vermont groups, 120 acres, adjoining the Fairview Red Rock, $120,000 and 25 per cent of the capital stock of the company already formed to operate the mines. The mother vein of the district, which passes through the Eagle's Nest, Eagle, Nevada Hills, Cedars and Red Rock, which adjoin, has just been opened up on the Reliance and Vermont claims of this group and in the opinion of Engineers Gunn Hoffman and Hamilton of Utah and Nevada, who are authorities on the geology of Western Nevada, the Reliance Company will at depth uncover the biggest ore bodies of the Fairview district.

Valuable Claims

SIXTY-FIVE INDICTMENTS FOUND AGAINST RUEF AT SAN FRANCISCO

Grand Jury's Sensational Session Produces Something Startling at Last---Definite and Circumstantial Story of Graft Narrated by Prosecutor Francis Heney and Detective Burns

SAN FRANCISCO, March 20.—The long looked for indictments in the municipal graft cases were returned tonight. Shortly before six o'clock the grand jury filed with Presiding Judge Coffey of the superior court seventy-five indictments charging bribery, which were found on evidence presented to the grand jury after six months of probing into the municipal affairs of this city by Assistant District Attorney Francis J. Heney and Secret Service Agent William J. Burns, and which reveal an amazing story of alleged graft. The corruption surpasses the St Louis cases, ranks with the Minneapolis exposé, and is only eclipsed in the amount of money passed but not in its ramifications.

The Ruef Charges

Of the indictments returned today, sixty-five are against Abraham Ruef, charging him with bribing the board of supervisors to grant franchises to the United Railroads, the Home Telephone Company, the San Francisco Gas & Electric Company and the so-called prize fight "trust" and ten are against T. V. Halsey, former general agent for the Pacific States Telephone & Telegraph Company, who is charged with having bribed the supervisors not to grant a franchise to the rival company. One indictment against Ruef and four against Halsey were also returned today but were not filed in open court. Several more indictments were returned by the grand jury but not filed.

Of the sixty-five counts of bribery against Ruef seventeen are in connection with the granting of the overhead trolley franchise to the United Railroads immediately after the disaster of April 1st. Seventeen are based upon money alleged to have been spent by the gas company to secure an eighty-five cent gas rate as against a seventy-five cent rate; thirteen refer to the passage of money by the Home Telephone Company to obtain a franchise for a bid of $25,000, which it has been declared was worth at least $1,000,000 and eighteen indictments are based upon the alleged bribing of the supervisors by Ruef to grant fight permits only to the so-called "fight trust" of this city which is composed of Eddie Graney, Morris Levy, James Coffroth and Willus Britt.

The money in all these cases is alleged to have been handled by Ruef, who according to Heney and Burns, was the agent and broker of the public service corporations and the board of supervisors and a sort of general distributing agent for all who desired the privilege from the supervisors.

The indictments against Halsey charge the agent of the Pacific States Telephone & Telegraph Company with having bribed fourteen members of the board of supervisors to refuse the rival company a franchise.

Judge Coffey fixed the bail at $10,000 on each indictment or a total of $650,000 for Ruef and $100,000 for Halsey. The latter is a brother-in-law of the late John I. Sabin, formerly president of the Pacific States Telephone & Telegraph Company, later of the the head of the telephone system in Chicago, and a brother-in-law of Louis Glass, president of the Philippine Telephone Company. Halsey has for some time been in Manila installing the system in the Islands. He has been under surveillance for several days and extradition papers will be applied for as soon as he has been taken into custody. Orders have been cabled for his arrest.

The Trolley Deals

In the overhead trolley deal, Ruef according to Burns, was given $185,000 by the United Railroads of which the political boss is alleged to have divided $91000 with the supervisors. Of this amount $4,000 is said to have been given to each of fourteen supervisors, two received $10,000 each and one $15,000.

In the re trieting of boxing permits to the "big four" of the fight trust, the indictments charge that $500 was given to each of eighteen supervisors or a total of $90,000, although a fund of $20,000 was said to have been contributed for Ruef.

In the alleged deal in which the gas company was given an eight-five cent rate, $12,000, it is charged, was divided among sixteen of the supervisors in sums of $750 each, but the amount supposed to have been received by Gallagher is not known.

Besides the $25,000 bid for its franchise, Ruef is charged with having divided among thirteen of the city fathers the sum of $62,000 received from the Home Telephone Company for the granting of a franchise to install its system in this city. In this connection, it is noteworthy that fourteen of the supervisors are alleged to have also taken $5,000 each from Halsey to prevent the granting of the franchise to the Home Telephone Company and it is upon these counts that fourteen indictments were returned against Halsey, only ten of which were filed today.

Only a Beginning

Assistant District Attorney Heney stated that today's indictments were not only "the beginning of the end of Ruef" but were also merely the beginning of the work of exposing municipal corruption in San Francisco and the prosecution of those "high up" who are responsible for such conditions in this city. District Attorney Langdon said immediately after the indictments had been filed "The remarkable organization of this grafting and corruption in the municipal affairs of San Francisco, its amazing ramifications, involving millionaires and the better class of citizens, will appal not only this city but the entire country when it is fully laid bare."

The indictments returned today followed the clever and indefatigable work of Heney and Burns during the past week or two days. The entering wedge was drawn when Supervisors Lonergan and Boxton are alleged to have been trapped several days ago by Heney and Burns in the act of taking a small bribe. Their confession of all grafting with which they were connected was followed last Saturday by the confession of Sanderson to Heney at Palo Alto.

Sanderson Confessed

He was formerly a schoolmate of Heney's went to Arizona several months ago and upon his return was met by Heney. When confronted by the latter evidence already in hand, Sanderson admitted, reluctantly, his part in the taking of bribes. With the confessions of these three supplemented by a mass of information obtained from other sources, the remainder of the supervisors except E. J. Furey were summoned before the grand jury Monday. When confronted by the confessions of their colleagues, it is said that they literally fell over each other to tell all.

WILLIE PHILLIPS GOES TO DEATH IN RUSHING WATERS OF TRUCKEE RIVER

GOVERNMENT CANAL OUT BUT DERBY DAM SAFE

Noted Electrical Engineer Arrives to Superintend Repairs of the Light and Power Company's Lines

One man drowned at Reno and another at Glendale; no trains to or from the west beyond Sacramento; circumstantial but absolutely unfounded rumors that the great government dam at Derby had gone out; no lights for Reno's residence districts and no light or power for Carson City; just enough power to keep the pumps at Virginia City from being drowned out—this is in brief the story of the third day of the great flood.

Light and Power

General Managing Engineer B. C. Condit of the Fleishaker electric interests on this coast arrived here yesterday afternoon at two o'clock to take charge of the repairs necessary at the Fairad, Fleish and other power houses of the Reno Light, Power & Water Company.

He will go up the river this morning to assist in superintending the construction of the Fairad plant, as Superintendent Brolli is laid up with a severe and sudden attack of the rheumatism.

Mr. Condit came direct from the American river plant of the Fleishakers. "The American river," he said, "is five feet higher than it ever has been before in its history and the plant of our company if four feet under water at this time."

Power Enough Soon

Mr. Condit said that the work at Fleish has proceeded so well that when it is ready this morning the power house there can be depended on to furnish power and light without a break. It will cut in this morning early and thereafter Virginia City and Carson City will be supplied with power and light—things that they lacked ever since the flood tore out the company's flumes in the mountains.

The street cars between Sparks and Reno and along Second street in Reno will probably be running this morning on time and just as they did before the beginning of the storm.

Yesterday and last night Washoe sub-station was all that could be depended upon to furnish the city of Reno with light and power. It also had to give enough "juice" to Virginia City to keep the pumps going. The company is under bond to the mines to pay a forfeit of $1000 an hour if the electric power is shut off for twenty-four consecutive hours. But, the forfeit aside the damage to the Comstock would be so great were the pumps to be drowned out that the electric power people will do all they can for Virginia City.

No break is reported in the Highland ditch, so the water supply of Reno is all right.

The Derby Dam

During the afternoon reports gained currency that the great dam of the government at Derby had gone out under the force of the flood. The great concrete dam is one of the marvels of engineering science and its plans have been studied and followed in all parts of the world.

Engineer Harrington, who was in charge of the construction, was in Reno yesterday and said that it was an impossibility that the main concrete structure could have been carried away, but he thought that, if anything had gone, the wing dam at the side might have given way before the flood. That, too, he was doubtful about as he thought it would stand any kind of a torrent.

He was right. A civil engineer who went out in the afternoon from Wadsworth found the ditches to be in good shape and the dam was intact when he left the place. At seven o'clock last night the water at Wadsworth had fallen eight inches during the afternoon and was still falling.

"The dam must be all right," said a gentleman at Wadsworth, who was called up by telephone last night. "If it had gone out, we should have had a tremendous rise in the river here by this time, whereas as a matter of fact the stream is falling rapidly. We are just seven miles this side of the dam and had it gone out there would have been a wall of water coming down the stream long before this."

Break in the Canal

Editor John S. Case of the Winnemucca Silver State who came to Reno last night said that the government reclamation canal had broken at the first outlet, where a few yards of the cement at the floodgate had been carried away.

"The break occurred at three o'clock this afternoon," he said "and men were telegraphed for at once. They are now at work and will be working all night. Engineer E. H. MacGregor of the government service is in charge of the repairs.

"The Derby dam is intact, but the water back of it has backed up for a great distance. There is no danger that it will go out, except for the great mass of driftwood and other debris that is beating against the structure. There is no serious difficulty there. The break in the canal, however, indicates that there is weakness at points on the ditch and there might be danger were it to carry the full force of water for which it was designed."

The Trains

The first passenger train through to the east passed through Reno early this morning. It was made up at Sacramento and run on the time of No. 2, as nearly as possible.

Freight will not be moved for two or three days, according to the present outlook. Trains are tied up on both sides of the breaks in the track in the mountains and everywhere the orders are that trains shall move slowly owing to soft road beds. From Sparks to Vista, the trains go at a snail's pace, as the long causeway has been weakened at points.

Large gangs of men are out everywhere and repairs are being made rapidly. There will be no trains for Goldfield before tonight at the earliest.

"STUDENT" BRAKEMEN

KANSAS CITY, Mo., March 20.—The Star says: Many extra brakemen known on the road as "student brakemen" have been employed on the road by the Santa Fe. About twenty-five new names have been placed on the board at the shops at Argentine with new men being added at the force at all division points of the Santa Fe.

Railroad employes believe that the railroad company is employing the student brakemen in anticipation of a strike.

YOUNG HERO IS DROWNED IN RESCUING FRIEND

HE WAS GOING OUT TO SAVE HIS CHUM KELLY

Boat Swamps and Leaves Him Clinging to Frail Rope Till Water Benumbs Him

Willie Phillips was drowned yesterday afternoon shortly after three o'clock, through being carried over the Riverside weir.

The young man at the time of his death was trying to reach the island where Jeff Kelly has been held a prisoner by the high water since his ferry line was carried away. Phillips was a "chum" of Kelly and had spent Sunday on the island with him.

The Boat Filled

A line had been stretched to the island, and young Phillips entered a small boat, pushing the painter around this line, and was trying to work his way to the island. He had proceeded in this way a short distance, when the weight of the current bore the gunwale of the boat down and it filled almost instantly. It was carried from under the boy, who grasped the guy rope.

All he could do was to hold on while his strength lasted. Friends on the shore of the river saw his danger, but nothing could be done to save him. Soon his strength failed him, and he was carried away by the swirling water to the weir and over it.

Once he was seen to raise a hand and seemed to wave it at those watching him from the bank, but he quickly disappeared and was seen no more.

Searching For Body

It is just about a year now since the same fate, at the same place befell Lake White, in much the same way, and the dam, during high water, is considered one of the most dangerous places on the river, as the current above it is extremely swift and powerful, and to be carried over it is con-

CORRECT EASTER CLOTHES for WELL-GROOMED MEN and BOYS

Our Spring Showing of Men's and Boys' Clothing Out-Classes in Style and Range of Assortment Any Previous Exhibit This or Any Other Store in This City Has Ever Had

OUR striking array of men's spring suits will appeal to the particular one who is looking for new clothes for Easter wear. They are absolutely correct in style and neither the fit nor the tailoring could possibly be improved upon by the highest priced custom tailor. The materials are of the finest texture and are absolutely all-wool. Included in this collection are the widely known Hackett-Carhart products whose meritorious features stamp them clothes for the man who cares.

EASTER DRESS ACCESSORIES
Gloves, Belts, Collars, Veils, Handkerchiefs, Etc.

Everything in dress accessories fashionable lady dressers might need to set off the Easter Gown. New ideas are arriving daily from New York.

DAINTY NECKWEAR—A large variety of pretty new styles in linen, lawn, lace and silk, representing the latest novelties of the season. Prices from.....25c to $1.50

NEW SPRING BELTS—A handsome line of the latest Eastern styles in silk, leather, elastic, etc., has just been received. Make it a point to see them. Prices ....25c to $2.50

SCARFS AND VEILS—Drape veils auto veils, and shoulder scarfs in all new spring shades in plain and fancy designs. Prices..$1 to $5

LONG GLOVES—In silk or kid, all the new spring shades. Silk ones, 16-button length, $2.00. Did ones, 16-button length, $350. 12 button length..... 3.00

HANDKERCHIEFS—Of fine linen, daintily embroidered or trimmed with lace...25c to $1.50

The Three Button Sack Suits

The style this spring most in vogue is the long single breasted sack, with concave semi-broad athletic shoulder, shaped to waist and over hips, either plain back or with pressed side plaits; lapels broad with long roll; 3-button front. Of the materials worsteds predominate, with the new grays in new club checks, shadow plaids and stripes much in evidence. Also mixtures in brown and brown and greens, Scotch tweeds in bold plaids, blue serges and dark silk mixtures. See window display. Prices

$11.00 to $40.00

PARENTS, we invite you to view our snappy, stylish Spring Suits for boys and youths. If you like to see your boy clothed better than the average lad, we are sure these lines will interest you. Such handsome and stylish suits for boys as these new ones are, are seldom to be found in a city the size of Reno. Even in the largest Coast or Eastern cities you couldn't find smarter styles or choicer patterns. Bring the boy in and let us show him and you how out-of-the-ordinary they are.

Boys' Spring Suits
$2.50 to $12.00

Handsome new spring shades and patterns in nobby little Buster Brown, Russian Blouse, Norfolk, Sailor and double breasted two or three piece styles with regular or knickerbocker trousers. Ages 3 to 16 years.

The Youths' Suits

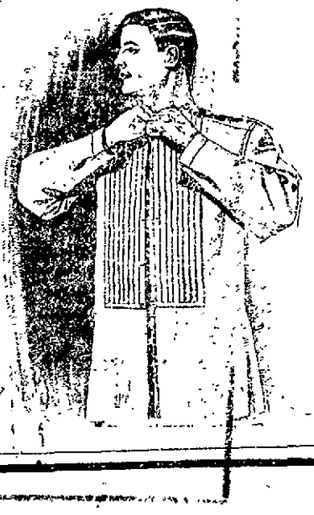

Smart single and double breasted models in swell new spring patterns and shades. Suits which cannot fail to please the young man who is looking for a distinctiveness in his clothes. Sizes from 30 to 36. Prices

$10.00 to $27.50

MEN'S EASTER FURNISHINGS
Smart Neckwear, Dressy Suits, Fancy Socks, Vests

Exceedingly attractive and stylish Haberdashery to complete your Easter wardrobe. Nowhere else will you find such nifty styles, such large variety or such moderate prices.

SPRING SHIRTS—All the plain shades as well as white and figured madras and percale, coat or regulation style, plain or pleated bosoms, cuffs attached or detached. Prices $1, $1.25, $1.50 and $2.

SPRING TIES—If you are going to buy new neckwear for spring it will profit you to look over our line. Hundreds of distinctive patterns—gay or conservative colorings.....25c and 50c

FANCY HOSIERY—With the low shoe season now at hand, you'll surely want some fancy hosiery. We are showing the latest spring effects in silk and lisle, balbriggan and cotton. Price..... 25c and 50c

JEROME INSISTS ON THAW'S INSANITY AND THE TRIAL WILL STOP

Exciting Day in the Case of the Murderer of Stanford White —New York District Attorney Plays His Trump Card With Effect

NEW YORK, March 21.—The blow which Harry Kendall Thaw has been in terror of ever since his trial for the murder of Stanford White began fell today. District Attorney Jerome did not make formal application for the appointment of a commission in lunacy but in an impassioned speech he appealed to the conscience of the court, declaring that as Thaw sits daily in court he is mentally [illegible] advising his counsel [illegible] is believed by everyone who watches him and comes into contact with him [illegible].

Jerome asserted that his [illegible] were convinced when they had considered all the facts in connection with the case that Thaw was of unsound mind. Jerome directly accused the counsel for the defense of concealing testimony which if presented to the court would make a continuance of the trial [illegible].

Goes on Tomorrow

So earnestly did Jerome plead that Justice Fitzgerald dismissed the jury on Friday morning and adjourned court until two o'clock tomorrow afternoon when he will consider what evidence either side has to offer and to decide whether the trial shall go on or whether a commission in lunacy shall be appointed to pass upon Thaw's mental condition today.

The scenes attending the adjournment of court shortly after one o'clock were dramatic and [illegible]. Thaw's counsel seemed taken utterly by surprise. This was expected [illegible] the last of the trial except [illegible] the summing up before the jury. Soon after the [illegible] discussion among Justice Fitzgerald, District Attorney Jerome and Delmas, [illegible] Thaw's five other attorneys gathered one by one round the judge's desk and for a time seemed intent upon denying what the court had [illegible] the charges of unfairness [illegible] dust brought against them by the prosecuting officer.

Thaw is Dejected

Thaw, dejected, pale and [illegible], sat at his counsel table [illegible] flushed crimson as one by one his attorneys left him to rally to the support of Delmas, who, however, [illegible] of proceedings [illegible] Attorney John [illegible] his nails opened and closed his hands nervously and finally sank down in his chair in an attitude of utter dejection. In an adjoining room where they could hear the excited and uplifted voices of counsel wrangling one with the other stood Mrs. William Thaw, the mother, and Evelyn Nesbit Thaw, the wife, who had kept the secrets of her soul in her effort to save her husband from the electric chair and from what he [illegible] fears more [illegible] of the nine weeks [illegible] tated by the action [illegible] in calling to the stand Dr. [illegible] McLain Hamilton [illegible] first called into the case [illegible] original lawyers [illegible] ber and Bowers [illegible] missed together with them [illegible] reported that Thaw was [illegible] from a form of [illegible] might never be cured. It was the intention of Mr. Delmas to interrogate Dr. Hamilton only with reference to four visits he made to Thaw in June and July.

Jerome Objects

Mr. Jerome promptly objected, saying that if Dr. Hamilton was to testify at all he must tell everything he knew in connection with the case including the defendant's family history. The argument that ensued became so [illegible] sanity or insanity of the defendant at the present time that Justice Fitzgerald ordered the jury to retire from the room. Then the discussion took on that broad range which resulted in the court's determination before proceeding further to have reported to him the facts which the district attorney reported had been withheld and which he had been unable to give to the court in strictly legal form.

"If the real facts were known," declared Jerome, "I have no right to be here trying this man for his life. But the knowledge I have cannot be put in legal form before the jury. It is mostly hearsay. But if I could get the facts before you they would shock and horrify the conscience of the court and in [illegible] this case would be stopped. So deeply have I been impressed with the [illegible] that I have served notice on counsel of record that if when this trial is concluded I find that they were in possession of facts which I believe to be in their possession I shall call the attention of the appellate division of the supreme court. I feel very [illegible] about this matter. There is not a man who has watched this defendant sitting here at this table that does not know that as he sits there he is incapable of advising counsel. Thus under the statute it becomes the duty of the court to stop the proceedings."

Thaw a Paranoiac

Mr. Delmas sought to have Mr. Jerome place himself on record as [illegible] commission but the district attorney would only repeat that he was calling the attention of the court to a matter which might [illegible] his conscience. Mr. Jerome said that doctors Wagner and Deemar, two of the Thaw family physicians, had told him that concerning epilepsy on both sides of the present family but the defense had failed to bring out these matters in the testimony.

"I submitted to the alienists summoned by the state all the facts in my possession," said Mr. Jerome, "and they one and all informed me that the defendant is suffering from a disease called paranoia, the chief characteristic of which are [illegible] delusions that acting under these [illegible] delusions he killed Stanford White, but that within the legal definition of insanity he knew the nature and quality of his act and knew the act to be wrong."

Justice Fitzgerald wanted to know if the alienists had informed the district attorney of their opinions before answering the long hypothetical question in court. Mr. Jerome admitted that they had. The evidence that he submitted to them had not been introduced in court however and he could not put it in the hypothetical question.

VICTORY FOR HEARST

ALBANY, N. Y., March 20.—The assembly judiciary committee today reported favorably the bill providing for a recount of the ballots cast at the mayoralty election in New York city in 1905.

WILLIE PHILLIPS IS DROWNED SAVING HIS FRIEND

(Concluded from page one)

[illegible] returned [illegible]

An immediate search was instituted for the body of Phillips but up to a late hour it had not been successful. In the other case referred to the search was also successful and it was only after hope of recovery had been abandoned that it was accidentally found on an island back of Sessions' ranch where so many other of the Truckee's victims have been found.

Young Phillips was one of the best known and most popular of Reno boys. He had been employed as caretaker at the Wheelmen's Club for some time and enjoyed a very large circle of warm friendships. The news of his sudden and tragic death yesterday came as a great shock to the whole city and mourning for his loss will be sincere and general.

The young man's parents, Mr. and Mrs. W. O. Phillips, are prostrated with grief over their loss. They have the sympathy of the entire community in their bereavement.

Willie was an only son and has three married sisters, Mrs. Dawson of Reno, Mrs. Forrest of Oakland and Mrs. Kenna of Mexico.

Late last night the searching party gave up the search for the night and will resume its work at eight o'clock this morning.

Early in the evening the city council held a hurried meeting and decided to offer a reward of $100 for the recovery of the body.

An Eye Witness' Story

Professor Roger Cornell who was an eye witness of the tragedy gave the following account of the occurrence:

"I tried to show Kelly who was on the island and who was getting anxious that he was all right. We decided to throw him a rope over from the mainland and after we had got the rope over there were two elderly men whose names I do not know came up to advise us as they said they knew all the currents of the river through having lived on the bank for the last twenty years. They said it was perfectly safe for a man to throw a rope over the guy rope which would be attached to the boat and a man could work over to the other side without any risk in the boat. They asked young Phillips, he being the lightest in weight of any in the crowd, whether he would undertake the trip. Phillips had been anxious to go over to the island ever since the flood isolated Jeff Kelly and as he was of a naturally daring nature he undertook the task. Following the suggestion of the two men he stood in the bow of the boat.

Down to Death

"As he reached a point about a quarter of the way over he saw that the boat was swamping and he grabbed for the guy rope. The boat immediately afterwards swamped and went out from under him. The waves kept hitting his face and it became evident that he could not hold on long but nothing could be done to save him as we were all helpless. He was then in midstream and it would have meant the loss of two lives instead of one for any man to have gone out on the rope which could barely sustain his weight under the pressure of the current. He presently dropped one hand and then after a moment he dropped the other and was dashed over the weir and down the stream. I think he was unconscious before he let go with the second hand. We did not see his body again."

The Wearisome Jerome

WHETHER Harry Thaw be insane or not, the actions of District Attorney Jerome of New York would indicate that a commission in insanity sitting upon Jerome might produce results.

A trial has been in progress for nearly two months in New York City at heavy expense to the taxpayers and at a great strain to the patience of the entire country. Loads of paper containing reports of the testimony in the particularly loathsome case have been sent out and now Jerome, who has shown that he knows all about Thaw, suddenly wishes to have the young man examined to see whether or not he is insane. The long trial is nearly over, drawn out to a tedious extent by the needless cross-examinations indulged in by the district attorney, and here we are threatened with another siege of it all.

Jerome charges his opposing counsel with unprofessional conduct in concealing facts. Bosh. He had the whole career of Thaw and Thaw's wife written out for him and carried the rolls into court every day. He knows that the young man is sane, but he knows, too, that the counsel for the defense have practically convinced the jury that there is a screw loose in Thaw's mental machinery and that the verdict will probably be one that will set the slayer of Stanford White free. That would hurt Jerome's amour propre and to save his vanity he has called for a commission and has made baseless accusations against the lawyers for the defense.

The whole case has been disgusting, but in nothing has it been so offensive as in the theatrical manner in which Jerome has insisted on conducting it.

And this is the man who was once thought of and even widely mentioned as a possible candidate for president of the United States. Not any Jerome in ours, if you please.

San Francisco Graft

WITH sixty-five indictments against him, even a stronger man than Abraham Ruef, the Republican boss of San Francisco, might begin to think that it was time to sit up and take notice.

Up to now Ruef has made the mistake of thinking that his opponents were too feeble to be of any danger to him. In this idea he has been confirmed by the attitude of those with whom he has surrounded himself, and the consequence is that, through wrong information, he has allowed himself to be caught in a predicament that may turn out to be serious. We say "may" because we have seen San Francisco bosses in worse plights before than Ruef is in now, and we have learned to remember that an indictment by a grand jury is merely an ex parte statement, so to speak.

In some states, where a grand jury is an important body, an indictment usually means a conviction. It is not so in California, by any means. If one will look over the list of grand jury indictments and then see how many have been followed by conviction, one will be surprised at the few cases in which such a thing occurs.

We have not the slightest doubt that there has been graft in San Francisco and that there is graft going on there now. Ruef must know all about it for he is too astute to allow his puppets to take bribes without understanding what they are doing. Schmitz probably knows all about it, too, though not necessarily, for the supervisors could do business without the mayor being aware of it.

It may be true that everything given out by Heney and Burns is fact. But—it does not mean conviction. Ruef will not be punished. Nor will anyone else.

The Publicity Bill

NEW Nevada can have no patience with obstacles to progress and that is what the ten assemblymen are who voted yesterday against the bill to establish a publicity commission in this state.

The Nevada Press association, representing the progressive thought of the state, fathered this bill. It could be of no individual advantage to any publisher. It would, on the contrary, take some of his printing away from him, in all probability. But it was decided to bring Nevada properly before the rest of the country and to do this and do it right, it was necessary that a systematic method of advertising should be adopted.

This will be accomplished by the publicity commission.

When the state senate shall have concurred in the amendments made yesterday in the house, the bill will go to the governor and we have no doubt that he will sign it, because Governor Sparks is a man of enterprise, one of the stalwart pillars of New Nevada, imbued with the spirit that is making this state one of the foremost in the union.

There is nothing small about Nevada and its governor is as big and progressive as his state. He sees the advantage that will come from publicity, properly applied, and the only men in this state who do not see it, apparently, are the ten who voted against the bill in the assembly. They are behind the times. If Nevada had been forced to rely on people of their class to boost her interests, she would still be a desert of sage-brush.

Stoddard's Stand

THE Journal is in receipt of a communication signed "tax-payer" in which exception is taken to our stand as to the corrections of Auditor Stoddard's action in refusing to approve the bills of special counsel retained by the district attorney to assist him in prosecuting accused persons in the courts.

"Tax-payer" talks about "professional jealousy" and other things. We can assure him that there is no professional jealousy on our part of Mr. Moran or anybody else. The law is very plain. He is not entitled to the assistance that the people are asked to give him. That is, he may need it, but the law does not say that he shall have it. In fact, he has been refused it by the law-makers. To seek to evade the provisions of the law by hiring attorneys by subterfuges is not what we expect in a man hired by the people to maintain the law.

As to "tax-payer's" questioning our facts, he simply does not know what he is talking about. District Attorney Barnes alone conducted the prosecution of Durrant in San Francisco, as Jerome is doing in the Thaw case and as Folk did in the St. Louis cases. It is true that these officials have assistants, but each assistant has one department of the superior court in California or the supreme court in New York in which he is in charge of the prosecutions. This is because there are many departments of the court—three in San Francisco, for instance, that try the criminal calendar.

Even if our district attorney were over-worked, that would not be an excuse for violating the law, as an effort is being made to do at this time. Consequently, we applaud Auditor Stoddard for his firm stand upon the question. We repeat: He is exactly right.

SAY THEY'RE FAIR

BOISE, March 20.—The afternoon session of the Haywood-Moyer trial devoted to the readings of affidavits and the hearing of the motion for a change of venue. Those of the defense quote the written and spoken utterances of Governor Gooding in which he indicated his belief in the guilt of the defendants. The state has twenty-two affidavits affirming that the makers had conversed with many people of the county and had failed to find prejudice. Discussion of the Steunenberg case had died down, they asserted, and there was not sufficient feeling to affect the fairness of the trial.

AGRARIAN TROUBLES

VIENNA, March 20.—The Austrian minister of the interior has ordered a considerable increase in the number of gendarmes upon the Bohemian frontier in order to prevent riotous peasants from crossing the frontier and starting disturbances in Austria. The foreign office says that unless the Roumanian government promptly suppresses the agrarian movement in Roumania, it is liable to soon get beyond control. It is believed here that the Russian agents are responsible for the recent anti-Jewish riots, their object being to inflame the anti-Semites in the southern provinces of Russia.

MEN FOR PANAMA

PARIS, March 20.—Leroy Parke, agent of the war department, has been in Europe for some months soliciting foreign labor for work upon the Panama canal and although he has encountered much opposition, he has succeeded in shipping 4,500 men, nearly all Spaniards or Italians and they are now going forward at the rate of about 500 a month.

NOTED STATESMAN DEAD

GENOA, March 20.—Many telegrams of condolence are arriving at San Remo, especially from Russia on the death there last night of Count Lumsdorff, the former Russian minister of foreign affairs.

SKIPPER TO EXPLAIN

WASHINGTON, March 20.—The navy department today issued an order for a court martial to try Captain William Swift, commander of the battleship Connecticut, which recently struck bottom.

SUCCESS IN LABOR ARBITRATION

(From the Toronto Globe)

While the press of Canada and the United States has incessantly urged the settlement of industrial disputes by arbitration and has discouraged every tendency to resort to actual hostilities, the sound precepts have been strengthened and supported by the practical adoption and maintenance of one of the most extensive and successful arbitration agreements in the industrial world today. This agreement has been in existence for five years between the American Newspaper Publishers' Association, whose membership is made up of the leading publishers of Canada and the United States, and the International Typographical Union, which includes workers in all the mechanical trades employed in newspaper publication. The best proof of the success of this voluntary scheme of arbitration is that, after five years' experience, it has been renewed, with some important extensions, by the virtual unanimous decision of both the contracting parties. In this the newspapers of both countries have done more to promote the cause of industrial arbitration than could be done by the most persuasive and convincing academic arguments.

The agreement makes it virtually impossible for a strike to take place in a newspaper office conducted under union rules. A local dispute under the former agreement was referred to two arbitrators, one representing each party, and these to choose a third. The new agreement dispenses with the third arbitrator, who was generally, on account of a lack of knowledge of technical questions, a source of trouble. Should the local arbitration fail the issue is submitted to a board of three, composed of one man of standing in each of the organizations and a third chosen by these as a man of national prominence. The decision by this board is final, and the respective organizations enforce compliance on the part of their members. An evidence of the perfect working of the system and the good faith observed by both parties was recently shown when a newspaper was threatened with a strike by a local union official. President Lynch of the International Typographical Union declared that every man who went out would lose his union card, and that the union would immediately supply men to take the place of the unauthorized strikers. While such good faith is maintained on both sides it is impossible for a newspaper to be paralyzed by a strike, and equally impossible for the employes to suffer injustice without full redress. It is significant that the old agreement covered only wages and hours, but the new includes working conditions also.

It is not contended that raw, untrained unions and organizations of employers not in touch with the spirit of modern industrialism can establish at once a perfect system of voluntary arbitration. The mutual respect, consideration and good faith essential are unfortunately of slow growth. There was much tribulation along the path by which both the parties to this agreement reached their present appreciation of mutual rights and obligations. Both have learned by adversity, and employers and employes in other industries can profit by their experience.

OLD NEVADAN PAYS RENO A VISIT ON HIS WAY TO GOLDFIELD

Harry Thornton Creswell, former city and county attorney of San Francisco, and lately police commissioner of that city, arrived in Reno yesterday. He lived in Nevada from 1872 until 1887, principally on the Comstock, and he has many friends in this state of whom a number live in this city.

Mr. Creswell last night excused himself from talking politics—particularly San Francisco politics. He said that the way in which San Franciscans are rebuilding their city is marvelous. He is a member of the law firm of Garber, Creswell and Garber of San Francisco, and will leave for Goldfield this evening.

HAS THE EXPERIENCE

A sheepherder arriving from Los Banos, California, yesterday morning, complained to the police that he had been robbed by a confidence man on the train between here and Sacramento of $60.

He said he gave the money for a check, which he took as security, and the face of which showed that it was good for $650. The sheepherder has the check and $60 worth of experience.

EMBEZZLER MAY RETURN

JEFFERSON CITY, March 20.—Judge Phillips in the federal court here today dismissed the case against James C. Thompson, charged with wrecking the First National Bank of Sedalia and who fled to Mexico leaving a shortage of $472,000. Thompson, who is now feeble, may return to his home at Sedalia without fear of prosecution.

THE SACRAMENTO FLOOD

SAN FRANCISCO, March 20.—While the headwaters of the Sacramento and San Joaquin rivers are falling, flood conditions still prevail in the valleys.

In the Sacramento valley the town of Woodland is experiencing one of the worst floods in its history. The railroad, telegraph and telephone services are demoralized and it is impossible to reach many of the points in or beyond the flooded district. Many trains are being held here and at other terminal points.

The Southern Pacific line east was cleared early this morning when the washout at Florist had been repaired and at ten o'clock the first of the belated overland trains arrived at Sacramento. There are a dozen stranded passenger trains at this place.

It is stated at railroad headquarters that it is not probable that any trains will go through the Siskiyous for several days. The Portland line is open from San Francisco to Red Bluff.

NEGRO BANKER MURDERED

HATTIESBURG, Miss., March 20.—Edward Howell, one of the most influential negroes in southern Mississippi, and president of the People's bank, was shot in the back and killed while on his way home late last night. No motive is known.

MORE MEN STRIKE

HAMMOND, Ind., March 20.—The strike situation at East Chicago was intensified today when 3500 men employed by the Inland Steel Company walked out. The reason for the walkout was the demand of the laborers for an increase of twenty-five cents per day.

RUSSIAN GOVERNMENT IS ACCUSED OF STEALING FAMINE FUNDS

ST. PETERSBURG, March 20.—Without any further allusion to the ministerial declaration of policy, the lower house of parliament today began the actual work of the session, with the organization of committees which in Russia, are elected instead of appointed. The committees on the budget, audit and on general finance, will be elected tomorrow, indicating that the discussion of the budget will be first in order.

The proposal to appoint a special committee to organize famine relief led to a long and animated debate in which various groups participated.

A peasant deputy boldly charged the government with stealing the money intended for the relief of the famine sufferers.

A CHARMING WEDDING

Two well known young Nevadans were united in marriage yesterday, when Miss Vadie May Hill became the wife of Seymour Case.

The ceremony was performed by Rev. C. L. Mears of the Congregational church of Reno, in the presence of a party of twenty intimate friends and relatives of the bride and groom at the residence of the bride's father, Thomas Hill, the widely known livestock man. An elaborate wedding supper was served at the conclusion of the ceremony.

The bridesmaid was Miss Jessie Hill, sister of Mrs. Case, and Editor John S. Case of the Silver State came from Winnemucca to act as best man for his brother.

STEAMSHIP MERGER

SEATTLE, March 20.—A merger of the Northwestern Steamship Company and the Alaska Steamship Company is reported to have taken place. The Morgan and Guggenheim interests, which control the Northwestern Company, are believed to be back of the undertaking. The two companies will maintain their identity but will be operated to the best interests of all concerned.

CARRIED OUT TO SEA

SAN DIEGO, March 20.—C. A. Martin, a prominent citizen of Detroit, Michigan and a director of the Michigan Mutal Life Company was drowned this morning while surf bathing at the Coronado Hotel. The surf was unusually high. He was carried out to sea. In a brave effort to save his life, the bathing instructor at the hotel, George Stoesi, an automobile dealer, nearly lost their lives.

MILWAUKEE FOR CORBETT

Young Corbett has received a wire from Milwaukee asking him to come to that city to meet the winner of the coming fight between Neary and Memsic. The wire was answered by a request for transportation.

WOMAN SUFFRAGISTS

LONDON, March 20.—Thirty woman suffragists were arrested this afternoon for attempting to force an entrance into the house of commons.

A LESSON FROM THE FLOOD

The flood has past and with it we hope the storm. But the memory of it will live for some time. Long enough for people who are looking for lots to build upon, to select a high and dry piece of land. We have undoubtedly the best two building sites in the city. The first, the University Addition, only one block west of the University grounds. The view from these lots is unsurpassed, overlooking as it does the entire city and the beautiful valley. No fear of flood up there, as the addition has an elevation of at least 200 feet above the river level. These beautiful lots all face east, and are much cheaper than any lots in town. We have only thirty left and you had best get in and buy one before they are sold, at prices from $300 up. The lots facing on Sierra street where there are building restrictions and none of these lots exceed $750 each.

The second addition, namely, the St. George's Addition, facing on Washington and Ralston streets have about the same elevation as the University Addition and equally as desirable. No rocks, beautiful view, high and dry, city water, proposed belt line to run through both additions; sewers will soon be in. These lots are even a little cheaper than the University Addition, ranging from $350 to $600. These lots will surely be worth double these figures inside of a year. For health and beauty these two additions have the advantage over any location in town.

The lots in these two additions are exclusively in our hands. The first half hour you have to spare ring us up on Phone 656 or call at our office, Rooms 1 and 2, 150 Virginia street and we will be glad to drive you up there to convince you that this advertisement is not merely real estate talk, but sound logic to those who are looking for Building Lots.

HAPPENINGS FROM SPARKS

PET DOG HUDDLED ON FLOATING COUCH

Many of the homes of the ranchers about Sparks are so badly under water that it is certain now that some of them will be so seriously damaged as to require entire rebuilding. John Kleppe at Glendale returned yesterday morning to his home on a raft in water four feet in depth. Upon entering he found his pet dog huddled on a couch, which was floating around the piano in over three feet of water. Kleppe lost several head of stock.

Four different families were taken from their homes by means of the boat brought from the asylum. Considering the great volume of water which has submerged such a vast territory adjacent to Sparks, the extent of stock loss has been surprisingly small and much less than at first reported. However, some of the families will feel their losses for some time to come. Many dead cattle are seen floating about. Twenty head were drowned at Glendale, while their owners were trying to save them. Men on horseback were seen dragging their stock by means of ropes to dry land.

FALLS FROM PLATFORM AND IS SLIGHTLY HURT

J. W. Bennett, the wellknown machinist, while working yesterday morning on the storehouse of the O. S. L., stepped backward thoughtlessly, and fell over the edge of the structure. He struck on some machinery several feet below and sustained several bruises and was wrenched badly, necessitating his giving up his work for a day or so.

ONE MAN'S BIG SCHEME

A passenger on one of the held up trains yesterday, while waiting in the yards here, created considerable amusement for the crowd around the platform. He had imbibed too freely and becoming impatient, he stood upon a freight truck and proclaimed that he had invented a huge tube through which the passengers could shoot at once from Sparks all the way to New York.

SNYDER AND HIS WOODEN SHOES TO RESCUE

J. A. Snyder, the popular proprietor of the Oberon, has made a reputation for himself during the last few days of the flood. Word came yesterday that a family were imprisoned in their home on a ranch near Glendale, and the backwaters were deepening around the house to an alarming extent. There was imminent danger and rescue was the cry. Snyder, ever on the alert and ready to lend aid, grabbed his wooden shoes and made a hasty rush for the scene of the impending danger. Wading to the house, Snyder assisted the folks in getting away to a place of safety.

PEOPLE AND EVENTS IN CITY OF SPARKS

Train Agent F. C. Smith has returned from San Francisco to Mina.

C. A. Branch will be a candidate for councilman from the third ward.

Mrs. W. H. Bishop came in from Rhyolite yesterday for a brief visit here.

William Hymer, the machinist has resigned his position in the shops and will go east.

O. L. Nance formerly of Sparks, returned yesterday from Sacramento to work in the shops.

W. A. Butler, proprietor of one of the leading hotels at Oakland, spent yesterday in this city.

The Electrician's ball postponed from last Monday night on account of the lights, is announced for next Tuesday night.

Mr. and Mrs. Mitchell, formerly of Sparks, arrived from their home in Winnemucca yesterday, to attend the funeral of their young nephew in Reno.

Joe Maltby, formerly assistant foreman of the round house at Ogden was in town yesterday. He will leave for Carlin today to take the position of foreman of the round house at that point.

REPTILES BY THE THOUSANDS IN WATER

A remarkable circumstance attendant upon the flooded district just east of Sparks developed yesterday morning as the first east bound train succeeded in getting through the washouts and pulled into the yards here. As the wheels of the train plowed through the water inundating the tracks, passengers on the platform of the rear car declare that literally thousands upon thousands of snakes of all kinds, from small black water snakes to large rattlers, and minks, musk rats and other vermin were seen squirming about—some dead—others still alive, as the wheels of the cars passed over them.

The backwaters from the canyon had brought these reptiles in myriads over the tracks, and the sight was as unique and remarkable as it was hideous.

NEIGHBORS QUARREL OVER ROVING STOCK

There was trouble yesterday in the camps of the Newes and Willis families. The roving of some stock belonging to one called forth some personal expressions of opinion from the other not in the least complimentary, and to which exception was seriously taken. A disturbance among neighbors is frequently a bad one, but how this will terminate, remains to be seen. Legal advice may result in further conflict.

AUTO IN TROUBLE

Mr. and Mrs. T. H. Crossy of Goldfield, found themselves stalled yesterday afternoon, the large Pope automobile of the Sullivan Trust Company in which they are traveling from Goldfield to Reno having run out of gasoline just as the machine struck one of the worst mud and water places at the east end of town. McKenzie and Carter of Reno were sent for and these two men went to the rescue with their car loaded with gasoline. About four o'clock the Goldfield car was pulled out of the water and the couple continued on their way to Reno.

YERINGTON RED METAL

We hereby certify that the following assays were made from ores taken by us personally from the mines of the Yerington Red Metal Mining Company, from the different claims as indicated in the assay sheets.

The vein matter on this property lies between a slate hanging wall and a granite footwall, and is about 300 feet wide.

The pay ore occurs in a dolomite lime, cropping out, and is traceable for more than 1200 feet on the surface.

The company has a crew of men working on the property, and we believe that under our management it will develop into a great paying mine.

The property is located nine miles northeast of Yerington, and three and one-half miles south of the Southern Pacific railroad, in the great copper zone which extends through this district.

O. A. DOCKHAM, Pres.
E. F. ADAMS, Gen. Mgr.

ASSAYING AND ENGINEERING DEPARTMENT NEVADA REAL ESTATE, MINING AND DEVELOPING COMPANY
228 Center Street, Reno, Nevada.
ASSAY CERTIFICATE

March 19, 1907.

We hereby certify that the samples assayed for E. F. Adams from the Yerington Red Metal property gave the following results:
Red Summit; .06 oz. gold per ton; gold value $1.20; (wall rock on surface) Total value per ton $1.20.
Red Metal No. 1, .05 oz. gold per ton; gold value $1.00; per cent copper 33.70, (from shaft) value in copper $168.50; total value per ton $169.50.

By T. H. REED.

NEVADA ASSAY OFFICE R. H. FRAZER & J. H. MACDOWELL, Mining and Civil Engineers.
Reno, Nevada, March 18, 1907.

Deposited by Red Metal M. Co. by Adams.
Crown Point No. 1 (surface) gold, trace; silver, 2 ozs; silver value per ton $1.40; total value per ton $1.40.
Crown Point (surface) gold, trace; silver trace; value per ton, nothing.
Red Metal No. 1 (open cut) gold trace; silver .5 oz.; value silver 35c; per cent copper 8.75; copper value $33.66.
Crown Point No. 2 (tunnel) gold trace; silver 1.6, silver value $1.12; per cent copper 7.41; value of copper $27.76.
Red Metal (surface) gold .02, value gold 40c; silver trace; per cent copper .21.
Crown Point No. 2 (100-foot tunnel) gold trace; silver .6; silver value 42 cents; per cent copper 24; copper value $100.76.

NEVADA ASSAY OFFICE,
Per R. H. FRAZER.

The Yerington Mining District is proving to be one of the greatest copper producing camps in the world. We own, and the same is on record in Dayton, Lyon county, Nevada, 200 acres of mineralized ground in this district, which we are developing, and we have every reason to believe that our mines will prove as rich as any in the district.

Sam Savage, an experienced mining man is in charge of our work and reports of progress will appear weekly in the Lyon County Times of Yerington. Copies of these reports will be mailed to our stockholders.

We are now offering an allotment of 50,000 shares at 10 cents per share, and we earnestly advise and recommend this stock at 10 cents, as the next advance will be to 25 cents per share. For particulars call or address

Yerington Red Metal Mining Co.

STOCKS, MINES and MARKETS

RAMSEY CAMP HAS HIGH GRADE GOLD VEINS

DEPTH ONLY NECESSARY TO MAKE BIG MINES

This Promising District Has Recently Been the Scene of Several Wonderfully Rich Disclosures Near the Surface

This district presents the best opportunity for the prospector and mining ker [illegible] any district in the State of Nevada today.

Not only is there plenty of ground to work on but there is plenty of proven ground that can be had extremely cheap for development. One factor and the greatest is the great surface showing of high grade ore and it is only with depth except in isolated places where really high grade ore is found.

There are a great many claims with ten foot holes on them showing values of $3 to $10 a ton needing development. In no place in the district where intelligent mining and prospecting has been done have the works failed to find ore of shipping value with depth.

The district is well watered, well timbered and close to markets and railroads, in fact is surrounded with railroads. Most of the business of the district is now going to Reno by way of Clarks station on the Central Pacific main line and the heavy hauling is from Pawnee and Apache on the Goldfield branch through the eastern gateway to the district. The grades are easy in both directions and ore will go down hill from any dump in the district to the side track.

As a district in which to do some prospecting and developing Ramsey cannot be equalled for there is plenty of ground yet to be had in all parts of the four square miles of the mineralized area. The camp is only four hours from Reno (by train to Clarks station and stage twelve miles from this point).

Telegraph and telephone lines are in operation in the town and the mail comes in daily from Clarks station. Good lodging houses, in fact Goldfield has none better despite its four years' age, good restaurant, a competent assay establishment, wood in the middle of winter only $7 a cord, water everywhere, bunch grass over the hills and in the canyon as thick as the hair on a dog's back, everything combines to make the district easy to prospect and comfortable to live in.

The town is in almost the heart of the district and a man may walk to any mine in an hour's time. The Ramsey Consolidated is within 700 yards of the postoffice and the Ramsey Comstock is only half a mile away. The New Comstock with its huge ledge of milling ore and its eighteen feet of high grade is about half a mile down the canyon to the east and the Walkover is less than a mile west.

On a quiet day the whistle of trains on the Central Pacific, the Goldfield branch and the Virginia City roads can be heard and being as it is on the famous old Comstock trend prospectors and mining men can compare discoveries with Comstock conditions by taking less than half a day's ride from Ramsey to Virginia City over a good road.

SILVER BOW

The LeRoy group of five claims which he just east of the McConagill Silver Fox company have struck ten inches of ore which runs as high as $160 a ton. The vein averages four feet in width and $4 in values clean across.

Kearns & Hummell of Goldfield have taken an option on the [illegible] and Donnelly fraction on which at a depth of fifteen feet a three foot vein shows values of $84.

The Nevada Development company which owns the Huntington rotary mill at Silver Bow has ordered a complete cyanide plant which will be delivered at once and be in operation by June 15. It is believed this ore can be treated in the new plant at $2.50 a ton.

BEWARE OF "DIGESTIVES"

The Only Way to Cure Stomach Disorders Is by Strengthening the Digestive Organs

The ordinary pepsin tablet has ruined more stomachs than all other causes combined. While it gives temporary relief it leaves the digestive system weaker than ever and the tablets must be continued with increased frequency.

The only way to permanently cure stomach troubles is by strengthening the digestive organs with a Mi-o-na stomach tablet taken before meals. In this way the remedy prepares the stomach for the food and excites the secretion of gastric juices so that when the food is eaten the stomach is prepared to digest it.

If Mi-o-na was a mere digestive it would be taken after eating so as to mix with the food but then permanent relief would not be gained.

Mi-o-na stomach tablets are sold only in a neat metal box convenient for the purse or vest pocket and cost but 50c. The Cann Drug Co. have seen so many cures made by Mi-o-na stomach tablets that they give a guarantee with every box that the money will be refunded if the remedy fails to give satisfaction. You run no risk in using Mio-na for you are sure to be cured at trifling expense, or else your money will be returned.

Will Thomas will see that you enjoy your meals at the Overland Cafe.

Trib cures sprains and burns.

RENO MEN BUY IN RICH MINE AT ELY

STRONG COMPANY FORMED FOR OPERATIONS THERE

Prominent Capitalists of Reno Have Taken Over the Arch Group and Will Thoroughly Develop the Property

Prominent Reno capitalists and business men have become identified with the organization of the Ely Arch Copper company with a capitalization of $5,000,000 says the Mining Exposition which will begin active development on the Arch group adjoining the holdings of the Ely Calamet Copper company.

Fred L. Smith of Reno is president. Oscar L. Smith, chairman of University regents and one of the owners of the Rocco Homestake mine at Hamilton and F. M. Lee, cashier of the Nixon National bank at Reno, are vice presidents. J. B. O'Sullivan, owner of the O'Sullivan tract at Sparks, is secretary.

The above named gentlemen together with R. L. Fulton of Reno, formerly land commissioner for the Southern Pacific, H. G. Humphreys of Reno, who is associated with Governor Sparks in the cattle business, H. S. Anderson, a prominent sheep man of Reno, P. L. Dotson and W. B. Morris of Pierre, South Dakota, comprise the board of directors.

D. A. DAWSON, P. M.

LONG LIVED

A machine to be long-lived has first to be constructed of the best materials and by expert mechanics. These are the foundation upon which the Pierce Cycles are built.

These bicycles are made with drop-forged frame connections and reinforced tubing, this is the reason why Pierce frames do not crystalize and brake. The bearings are made from the best of special cone steel and are made dust proof, needs oiling but once a year and will never wear out. This is why the Pierce is the easiest running wheel made because it is clean and always well oiled.

If you have had trouble with your short-lived bicycle come in and let us show you the difference between the long-lived Pierce and the short lived bicycle. We have both kinds.

A RICH DISCOVERY IN THE BEDERE MINE

VEIN DISCLOSED MORE THAN TWELVE FEET WIDE

A Vein Carrying Very High Values in Both Gold and Silver Has Been Encountered Within a Few Feet of the Surface.

One of the strongest points in favor of the Wonder Mining district is the fact that was patent from the first the area would be large. As discovery after discovery has placed the boundaries farther and farther from the original finds it seemed as if the limits had at last been reached. Now comes a rich gold discovery on the Bedere claims situate fully three miles from the Billy the Kid group in a westerly direction. The ore which J. W. Bedere, one of the owners, brought into camp recently ran $403. Of this gold formed a large part and the balance was silver. The rock was from a ten inch streak in a ledge of quartz fully twelve feet wide. The ground until now entirely undeveloped will be explored at depth and there is no doubt that the owners will make a fortune out of the claims.

While the finding of rich ore so far from the proven zone means a great deal to the camp it is by no means the most important development of the week. For W. S. O'Brien while prospecting the surface of the Rex Wonder estate came suddenly upon a monster quartz ledge. After careful prospecting he discovered an exceedingly rich ore shoot which has since proven to be several hundred feet in length and fully ten feet wide. The ledge itself is all of twenty five feet across. The average values across the entire ten feet of ore is $16. Picked samples returned values as high as $300. The vein has been trenched across in several places and a tunnel is being run to catch the shoot at a depth of about twenty feet. The ore body will be prospected thoroughly and will give a powerful incentive to the owners of all that ground to the eastward. The discovery of the rock was due to a peculiar accident. O'Brien who is a veteran of the Spanish American war and bears the scar which proclaim him a hero was picking his way carefully along this hill side. He is slightly lame due to a bullet wound through both hips. As he walked he was careful to guard against a misstep which would tumble him fully three hundred feet into the gulch. Suddenly a stone rolled under his foot and as he slipped he instinctively threw out his arms and clutched a clump of sage brush. The brush saved him but in gaining his feet came loose and displayed the goldbearing quartz. In less than an hour O'Brien had a force of men at work on the spot and one of the richest finds in the camp has resulted.

THE MARKET FOR SILVER AND COPPER
